SUMMARY

Business analyst with 6+ years of experience improving business processes, translating stakeholder requirements into technology solutions, and leveraging data to drive operational decisions. Brings together industry experience with graduate education in Business Analytics and hands-on expertise in Power BI, SQL, and Python to build dashboards, automate reporting, and deliver actionable insights that support business decision-making.

TECHNICAL SKILLS

Power BI (DAX, Power Query/M) • SQL • Python • Excel • Data Modeling (Star & Snowflake schema) • ETL • Data Visualization.

PROJECT EXPERIENCE

Healthcare Price Transparency Analysis, *Python, Power BI*

June 2026

- Evaluated pricing data across 3 Louisville hospitals covering 48 procedures and 46 payers, developing a Power BI dashboard that uncovered a 3× gap between negotiated rates and gross charges.

Environmental Health Monitoring ETL Dashboard, *Python, SQL, PostgreSQL, Dash*

May 2026

- Automated ingestion and validation of weather and air quality data from multiple APIs into PostgreSQL, eliminating manual data collection and supporting real-time reporting.
- Developed an interactive Dash dashboard that consolidated weather forecasts, AQI, and health indicators into a single view, enabling users to quickly assess environmental conditions and health risks across multiple locations.

Heart Disease Mortality, *Python, Excel Datawrapper*

April 2026

- Independently extended CDC WONDER mortality analysis to a county-level study across all 120 Kentucky counties (2019–2024), creating a choropleth map that identified counties with mortality rates up to 2.5× the national average.

PROFESSIONAL EXPERIENCE

Data Analyst Intern, University of Louisville, Louisville, KY

Sep 2025 – Present

- Automated data cleaning and analyzed event and coaching datasets, reducing errors and improving planning and reporting effectiveness by 15%.
- Developed seven Power BI dashboards that gave university leadership visibility into event participation and coaching outcomes, reducing manual reporting and improving monitoring of program performance.

Data Analyst Intern, BroadStreet Institute, WI(Remote)

Feb 2026 – May 2026

- Analyzed CDC WONDER mortality data (2019–2024) across counties in multiple US states to identify regional ischemic heart disease trends, presenting findings and visualizations to public health stakeholders to support data-driven intervention planning.

User Experience Designer, Saddleback Church, CA(Remote)

Jul 2023 – Jun 2024

- Evaluated quantitative engagement metrics and qualitative survey responses from 15+ stakeholder interviews to identify usability trends and prioritize product improvements.
- Tracked and analyzed user engagement metrics over time, delivering regular reports that surfaced trends in communication effectiveness and informed leadership's outreach strategy.
- Synthesized qualitative survey data into structured insights, mapping user journeys and pain points to guide product design decisions.

Business Analyst, Novelty Technology LLC, Kathmandu, Nepal

Aug 2017 – Jul 2023

- Analyzed large-scale PACE financing datasets in Excel and SQL to identify calculation errors and inefficiencies, redesigning the loan amortization workflow to reduce processing time by 50% and cut costs by 10%.
- Built recurring operational dashboards tracking sprint delivery, project health, and team performance, enabling project managers to identify delivery risks early and increase development velocity by 30%.
- Translated business requirements from external stakeholders into structured technical documentation and data workflows that shaped product specifications.

EDUCATION

University of Louisville, Louisville, KY

Master of Science in Business Analytics

Expected: July 2026
